

Showcase your AI Innovation

The Museum of AI Artifact Collection

Get your innovation added to the MoAI Collection. Here's all you need to know to elevate your AI creation, creator, or memory to artifact status.

What is the Museum of AI Artifact Collection?

Museum of AI [curates & exhibits artifacts](#) that explain pivotal innovations in artificial intelligence. We nurture understanding of important contributions (not just the usual suspects: The collection prioritizes nonobvious milestones). These artifacts look cool, designed by artists and lovingly displayed in popup lobbies. View the [Artifact Collection](#) online.

Artist-designed, AI-inspired

MoAI artifacts are **precious physical objects** representing tangibles (an AI chip, artistic creation, or end user) and intangibles (a voice, an event, or conversational AI algorithm). These appear on sleek black pedestals, lit under glass. Each artifact includes an explanation of its provenance, function, and impact. [Online, artifacts present](#) as video, images, and text.

What's in it for you?

- Artifacts displayed at live experiences, on-trend popup lobbies
- High-quality, shareable content from social media influencers
- Recognition at tech conferences, museum installations

A typical audience includes business decision makers, AI creators, experience designers.

What do you need to do?

Commit to collaborating with MoAI curators and designers to describe the innovative concept, code, moment, or outcome that will be represented as an artifact.

[Museum of AI](#) is dedicated to helping people work with real-world artificial intelligence. Our entertaining, educational experiences explore relevant problems, plus AI capabilities and limitations. Suitable for people in government or enterprise.

The [MoAI team](#) includes seasoned installation artists, actors, writers, educators - plus engineers with extensive enterprise software sales, development, and training experience.

➔ Ready to nominate your innovation?

Nominate your innovation for museum artifact status

We are proud to showcase innovations in the [Museum of AI Collection](#). What would you like to see elevated to artifact status? Choose something:

Tangible. The MoAI collection need not contain your actual object (chips, trophies, or artwork). Our designers typically create a replica, photo, video, or illustration.

Or intangible. Artifacts often represent algorithms, human faces, audio clips, memories, moments, or events with particular significance in AI/ML evolution.

Museum of AI artifacts are physical objects representing pivotal people, moments, and creations in the evolution of artificial intelligence. Displayed in funky contemporary style, under glass and beautifully lit.

Other things to know

Once Museum of AI agrees to create your artifact for the collection, your team will have input into its design and presentation.

The creators of your AI innovation will be prominently credited, both in the physical artifact display and on the MoAI site.

Artifacts remain property of the Museum of AI. However, they are available for display at your permanent or popup location (we'd just need to work out some details).

We can't wait to see what you've been up to!
